Nano-Electronics for Secure Systems

Fall School NESSY: Nano-Electronics for Secure Systems

Lübeck, Germany, 10-11 November 2021 (physical event)

<https://cardis2021.its.uni-luebeck.de/>

Call for Student Posters

The CARDIS 2021 conference and the DFG Priority Program “Nano Security” are organizing a joint Fall School “NESSY: Nano-Electronics for Secure Systems”.

We invite doctoral students working on hardware security topics to present their ongoing work, challenges they are facing, and possible new research directions.

There will be a poster session during NESSY and a further poster session during the CARDIS conference (November 11-12) for those registered for CARDIS.

Note that both sessions require physical presence!

Submission instructions:

All doctoral students registered for NESSY can submit either a poster draft or a short (1-2 paragraphs) description to ilia.polian@informatik.uni-stuttgart.de before **October 7, 2021**. The submissions will undergo a light review. The authors of accepted posters will be notified on October 14, 2021.

Please consult the CARDIS website for registration, travel, etc.

See you in Lübeck on November 10-11!
